EDUCATION AND TRAINING

1 MAR 2024 – CURRENT Cairo, Egypt

PH.D ARCHITECTURE ENGINEERING IS STUDYING Al-Azhar University

Website <https://eng-azhar.net/>

2013 – 2016 Gaza, Autonomous Palestinian Territories

MASTER OF ARCHITECTURAL ENGINEERING Islamic University

This appears to be a detailed research summary or abstract related to the impact of evolving interior finishing materials on the design of public buildings, specifically banks. The study aims to analyze how modern finishing materials affect the interior design of these buildings and their impact on employees and customers. It also highlights the rapid developments in interior finishing materials and their influence on the overall design and functionality of the spaces within these buildings.

The research methodology involved reviewing relevant literature, using analytical methods to describe and analyze the properties of these materials, conducting interviews, field visits to relevant institutions, and distributing surveys to gauge customer and employee satisfaction.

The study likely concludes with findings and recommendations that can be used to achieve a distinctive interior architectural style that prioritizes quality, function, and user satisfaction in public buildings, particularly banks.

Please let me know if you have any specific questions or if you need further information related to this research.

Thesis The Effect of Finishing Materials Development on the Interior Design of Public Buildings

2011 Gaza, Autonomous Palestinian Territories

BACHELOR OF ARCHITECTURAL ENGINEERING University of Palestine

This research aims to study the design of the "Modern Medical Sciences Hub" in Gaza, utilizing sustainability and technology concepts to enhance healthcare education and architectural environment. The research is based on analyzing similar local and international cases to guide the project's design. It covers various stages, from understanding the needs to defining project components and analyzing the proposed site. The project aims to improve healthcare and educational services in the Gaza strip.

CREATIVE WORKS

2022
A & B towers Prototype

The Overall Form Of the Two Towers:
It is dominated by a dynamic architectural style and represents constant power and movement. The primary mass of the two towers is an oval form that wraps around itself and is surrounded by outer shells. It considers sustainability by employing green spaces and coverings to offer thermal insulation for the structure, among other things.

2012 – 2013
The Strategic Development Plan for the Municipality of Khan Yunis

I served as the Executive Director of the consulting team responsible for preparing a significant strategic development plan for institutions and communities in the Gaza Strip. This plan was designed to address the challenges arising from occupation, blockade, population growth, and limited resources. It relied on a reliable scientific methodology, included goal setting, and the selection of developmental programs and projects, all with active community participation. The plan also made use of the guidelines provided by the Ministry of Local Government and the Support and Loan Fund.
